

SB, Bearing cage, K1270 Rail, 2025-12

SYMPTOM/DESCRIPTION

To improve the bearing housing, a new updated bearing housing design is introduced. The new housing is not backward compatible with the existing K1270 rail machines on the market.

CORRECTIVE ACTION

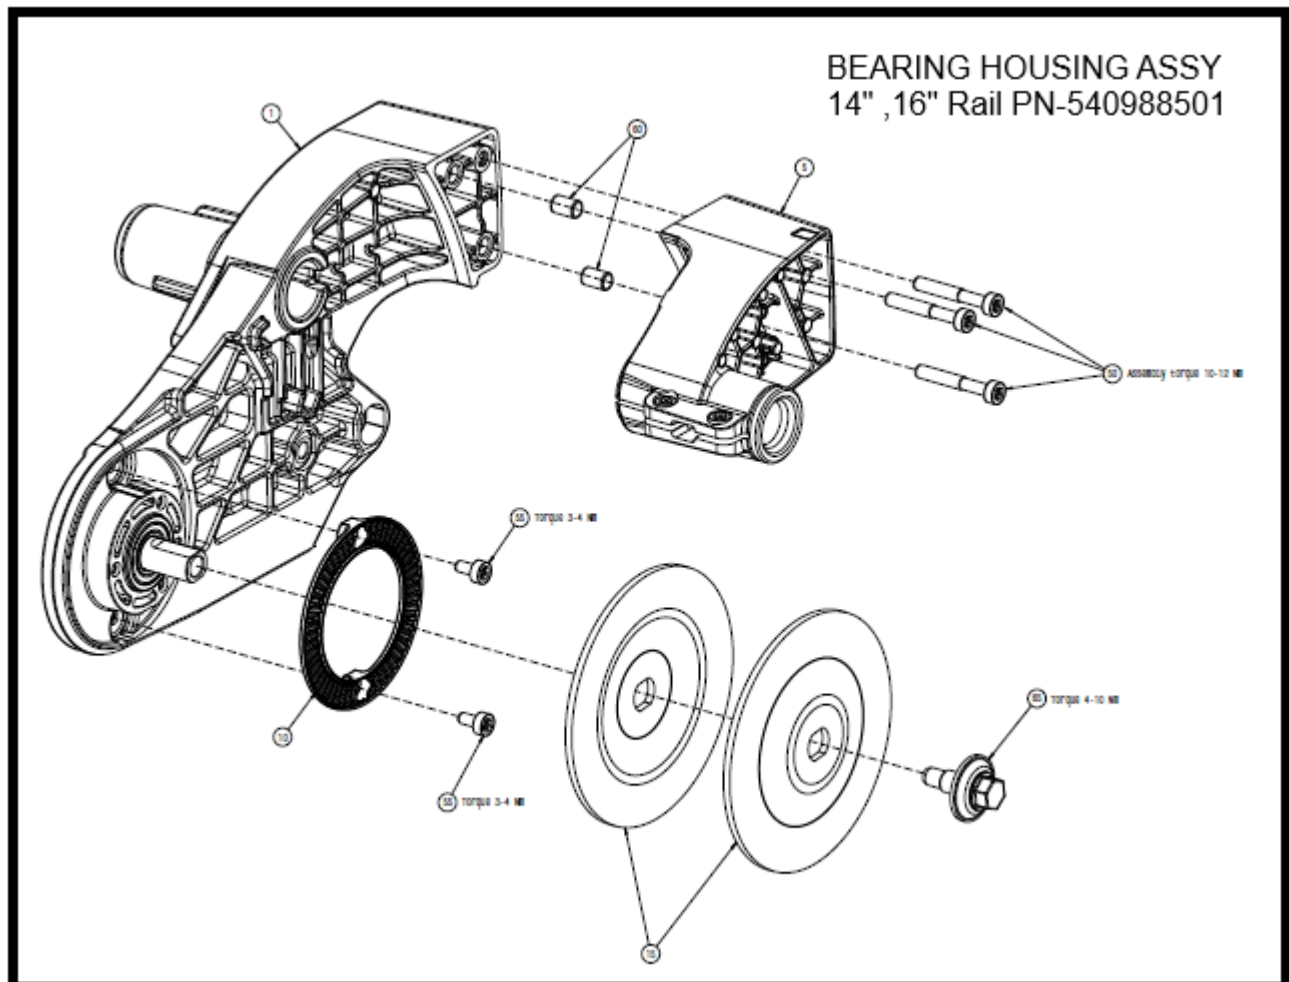

No action required for existing machines unless a housing repair or change of parts are needed. A rebuilding Kit is introduced to enable rebuilding the housing for the existing machines when needed. The Kit also includes a new belt guard, a belt tensioner, and a drive belt that need to be changed to the updated version.

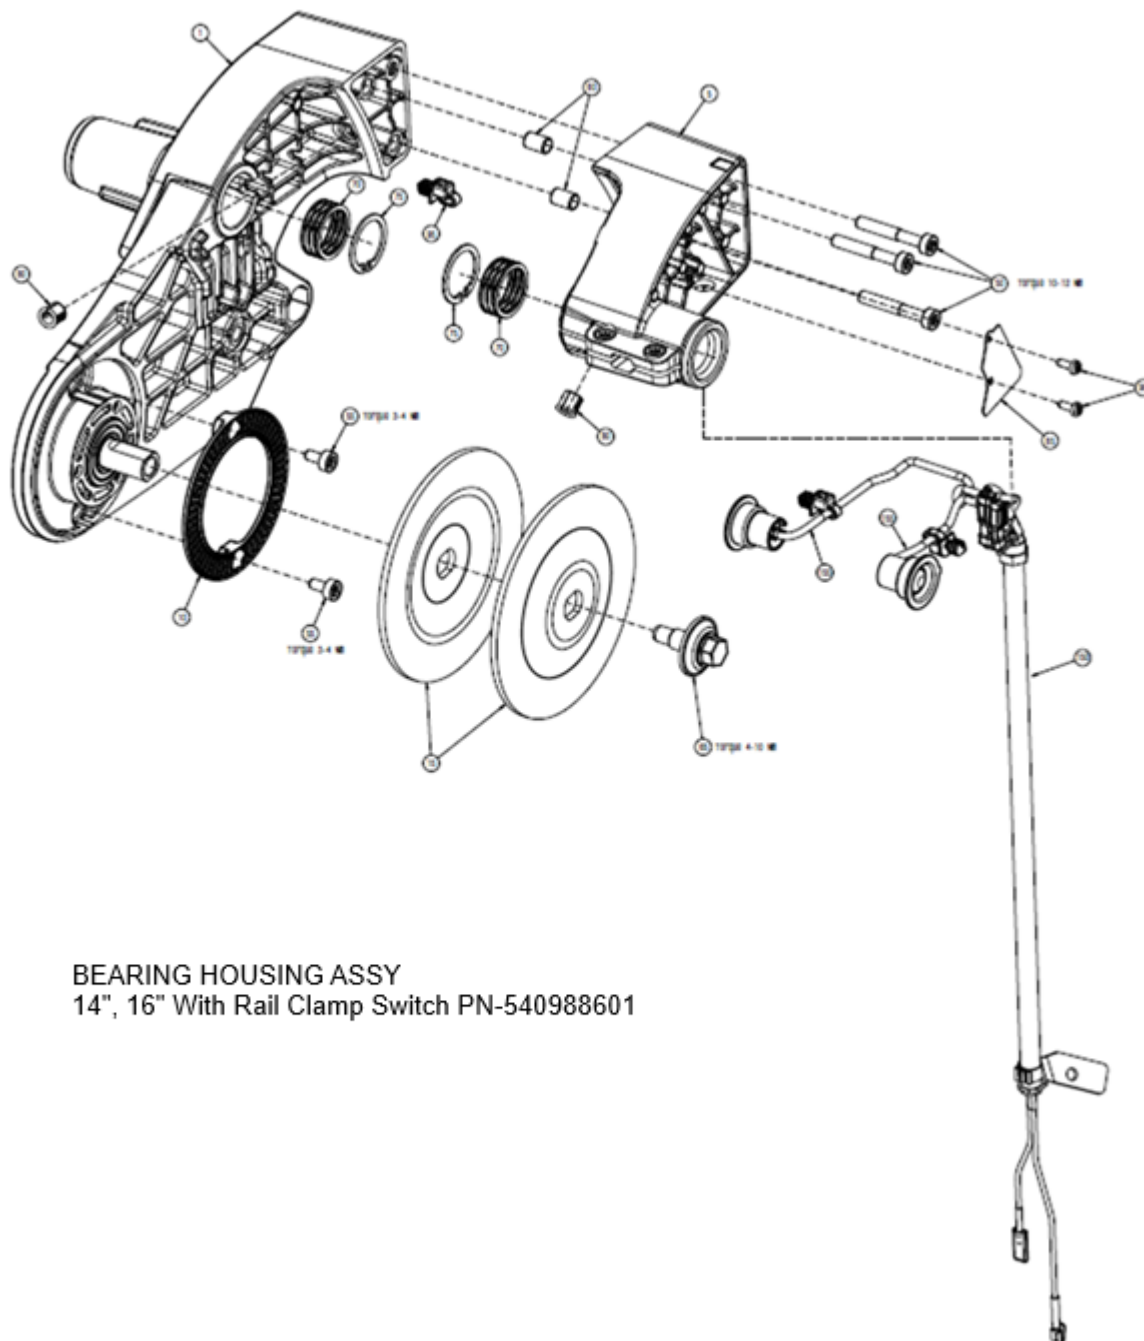

Note: When the bearing housing is changed to the updated version, it is required to change the belt guard and use the updated belt. Instead of a separate housing for 14" and 16", the new bearing housing is a standard version replacing both.
